MISCELLANEOUS INFORMATION

HOUSE AND STREET DIRECTORY.
The streets are arranged in alphabetical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupant householder.
The profession, business, etc., of individuals and firms are only given at their respective places of business.
Chisholm street is the dividing line for all streets running North and South, and Second avenue for all streets running East and West. The system adopted is the same as used in Philadelphia and other large cities, known as the "decimal" system—one hundred numbers being allowed for each block. In cases where vacant lots, etc., occur, the usual number have been allotted them.

Note—Numbers in parentheses, viz. (1246), denote that the houses are incorrectly numbered, but their placement on the guide between the intersecting streets is correct. Double numbers, as 610 (910), denote that the number in parenthesis is on the house, but the number preceding is correct.
