Michigan Central RAILROAD.

The "Niagara Falls Route."

The "Niagara Falls Route."

As the name implies, the Michigan Central runs through the central and best portions of the great State of Michigan; its lines extending from Chicago to Buffalo and Niagara Falls via Detroit, from Jackson to Bay City via Lansing and Saginaw, from Mackinaw City to Toledo via Bay City East Saginaw and Detroit, and from Detroit to Grand Rapids via Jackson, in addition to the Air Line from Jackson to Niles, and branches to South Haven, South Bend, Joliet, Caro and Five Lakes.

These lines tap all the principal cities and towns in Michigan, and lines of Through Cars are run between all of these cities.

The Passenger Equipment of the Road during the past year has been largely increased and improved, and every thing that modern science and skill have done for the comfort and safety of railroad travelers can be found in the Michigan Central Trains. Smoking Cars with Revolving Chairs, and richly upholstered Drawing Room Cars are run on the Day Trains. New, Spacious and Palatial Sleeping Cars are run on all Night Trains, and on the Main Line Expresses the justly famous Dining Cars will be found to supply in an elegant and wholesome manner, meals that are praised by the epicures of our Country.

There are many advantages for all classes of travelers, to be had by taking the Michigan Central Trains, that cannot be found on rival lines, and we can safely recommend it to all travelers.

Through Cars are run without change in both directions between Detroit-New York and Boston; St. Louis, New York and Boston.

VALLEY SEWER PIPE WORKS,

Manufacturers of

Cement, Sewer,  and CHIMNEY PIPE.

Tile and Cement for Sale.

CORNER FRANKLIN & THOMPSON STS.

(South of D. & B. C. Depot.)

EAST SAGINAW, MICH.

Why is Cement Pipe better than other things that have always been used for such purposes? Because they are joined together in the most perfect manner of any Pipe now in use. A Description of what Cement Pipe is, how it is made, and what it is used for, etc.:

Cement Drain, Sewer and Well Pipe is manufactured of a concrete, made from Hydraulic Cement and clean sand or gravel, very carefully mixed, and moulded under pressure around a smooth polished iron core, by which the interior surface of the pipe is left perfectly smooth and uniform thereby reducing the loss of flow from friction to the smallest minimum.

We claim for our DRAIN AND SEWER PIPE a great superiority over brick or stone sewers, or the stone ware pipe, in regard to PERFECTION OF FORM AND FINISH, and in UNIFORMITY OF SIZE, and there being no fire splits or roughness caused by burning. Cement Pipe hardens with age and dampness until it finally becomes as HARD AS ROCK, AND AS LASTING AS THE EARTH in which it is laid.

These Pipes are all made under royalty to the CEMENT PIPE PATENT ASSOCIATION.

We make no second quality, and advertise only such sizes and styles as we manufacture.

All Orders will receive Prompt Attention. Special inducements to the Trade.
